Professional color therapy for the holistic mind and spiritually adventurous seeker.

**Lumalight Illuminating System**

**Discover the power of color energy with Lumalight**

**Unlocking** the body's **self-healing power**

Color light therapy enters the mainstream

In its purest form color is energy and is carried in light and is constantly in motion. A denser form of this energy, for example, would be colors seen in the clothes we wear, the food we eat and how we see the coloration of objects and nature based on our perception of visible surroundings.

**Lumalight Holographic Session**

Color Harmonics is an advanced methodology of color therapy and encompasses a revolutionary approach to restore and maintain a correct balance of vital energy in the energy field. It is a holistic approach for beauty and vitality based on a myriad of disciplines of science and philosophy combining holographic geometric concepts, color therapy, acupuncture and reflexology.

**20 Geometry Inserts Platonic and Cosmic Designs**

Everything in Nature and all life on Earth is influenced and colored by the visible rainbow spectrum. There are seven primary colors carried in light that are further distilled into shades, combinations and patterns explored in the *Color Harmonics* System.

**Spectrahue. Lighting the way for over a decade.**
